

DESIGN SHOWCASE
VOL 5

ABOUT US

SURGE is a community of gaming enthusiasts that thrives in the digital creation of interactive entertainment through evocative and inspiring imagery

LIGHTING

ENVIRONMENTAL DESIGN & 3D VISUALS

'blender and cycles'

This image conveys the atmosphere of calm and concentration.

The image has simple volumes and austerity. The environment was kept as simple as possible and it displays the tips and tricks in lighting theories.

ANIMATION

THE DEAD ROBOT

'blender and cycles'

We used a High Dynamic Range image (HDRI)to lighten the scene. The HDRI captured the real world light data and the panorama of the image produced light values of an accurate intensity creating an uncanny photorealistic effect.

HYPER REALISM

ENVIRONMENTAL DESIGN & 3D VISUALS

'blender and cycles'

HDRI

LOTUS FLOWER

'blender and cycles'

This image focuses on the use of focal length and aperture to convey depth of field. The rule of thirds was used to compose this image.

The image was inspired by the fascination of the mood in a modern environment .
The outdoor scene exhibits the natural elements applied.

There is Profound and enduring beauty in simplicity, in clarity and in efficiency. True simplicity is derived from so much more than the absence of clutter and ornamentation. It is about bringing order to complexity.

GAME DEVELOPMENT

ICARUS ASCENDING

Unreal Engine

*We exist to create experiences where passion and
purpose come together*
